### DETAILED ACTION

This office action is in response to the amendment filed on January 13, 2006.

#### *Claim Objections*

Claims 60, 67, and 68 are objected to because of the following reasons: The preamble of dependent claims 60, 67, and 68 solely refer to the “computer program” of claims 63 and 66 and not the “computer readable medium” on which the program is stored. By such phrasing, claims 60, 67, and 68 appear to be excluding the computer readable medium. Excluding the computer readable medium further excludes the computer program itself because the computer program exists or is stored on the computer readable medium. Appropriate correction is required.

#### *Claim Rejections - 35 USC § 101*

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

*Claims 60, 67, 68 are rejected under 35 USC 101.*

Claims 60, 67, and 68 are drawn to a “program” *per se* as recited in the preamble and as such are non-statutory subject matter. See MPEP § 2106.IV.B.1.a. Data structures not claimed as embodied in computer readable media are descriptive material *per se* and are not statutory because they are not capable of causing functional change in the computer. See, e.g., *Warmerdam*, 33 F.3d at 1361, 31 USPQ2d at 1760 (claim to a data structure *per se* held nonstatutory). Such claimed data structures do not define any structural and functional interrelationships between the data structure and other claimed aspects of the invention, which permit the data structure's functionality to be realized. In contrast, a claimed computer readable

Art Unit: 2627

medium encoded with a data structure defines structural and functional interrelationships between the data structure and the computer software and hardware components which permit the data structure's functionality to be realized, and is thus statutory. Similarly, computer programs claimed as computer listings *per se*, i.e., the descriptions or expressions of the programs are not physical “things.” They are neither computer components nor statutory processes, as they are not “acts” being performed. Such claimed computer programs do not define any structural and functional interrelationships between the computer program and other claimed elements of a computer, which permit the computer program's functionality to be realized.

#### ***Allowable Subject Matter***

Claims 2-8, 10-16, 18-24, 26-32, 34-40, 42-48, 50-58, and 61-66 are allowable for the reasons given in the previous office action (mailed on 10/12/05).

#### ***Response to Arguments***

Applicant's arguments filed January 13, 2006 have been fully considered and are persuasive in part. The applicant has amended claims 61-66 to overcome the 35 U.S.C. 101 rejection stated in the previous office action. However, with regards to dependent claims 60, 67, and 68, the applicant has not fully complied with 35 U.S.C. 101 because the claims are drawn to a “program” as recited in the preambles and as such is non-statutory subject matter.

*Conclusion*

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
